VERSION 1.0 | SEPTEMBER 2026

Warranty Summary for Eligible Sound Barrier DA Series Amplifiers

Sound Barrier provides a one year standard limited warranty for eligible DA Series amplifiers. Register an eligible amplifier within 90 days of the original retail purchase date to receive three years of total limited warranty coverage at no additional cost.

This DA Series Warranty Summary controls the warranty duration and registration eligibility for eligible DA Series amplifiers. The Sound Barrier Global Warranty and Product Support Policy controls all other warranty conditions, exclusions, claims, remedies, service rules, and legal terms.

Warranty Period

Coverage	DA Series Warranty Term
Standard Limited Warranty	One year from the original retail purchase date. Registration is not required.
Registered Limited Warranty	Three years total from the original retail purchase date. This is not three years in addition to the standard warranty period.
Registration Deadline	Register within 90 days after the original retail purchase date. Sound Barrier may accept registration up to 30 additional calendar days late with acceptable proof of purchase; acceptance during that grace period is not guaranteed.
Eligible Products	Sound Barrier DA Series amplifiers expressly identified by Sound Barrier as eligible for this warranty. The product page for the exact model confirms eligibility.

What This Warranty Covers

During the applicable warranty period, Sound Barrier warrants that an eligible DA Series amplifier will be free from defects in materials and workmanship under normal professional use and when operated within its published specifications.

Coverage applies to a confirmed manufacturing defect in the amplifier and its factory-installed components. A product failure alone does not establish a manufacturing defect. Sound Barrier may inspect, test, and evaluate the product before determining whether a claim is covered.

Registration and Proof of Purchase

Registration is required only for the three year registered limited warranty period. The registration record confirms that information was received; it does not approve, confirm, or guarantee warranty coverage.

- A legible, genuine dated invoice or receipt from an Authorized Sales Channel is required for a warranty claim.
- The proof of purchase must identify the product and original purchase date. Sound Barrier may request the serial number, purchaser details, and other information needed to verify eligibility.
- When a claim is filed, Sound Barrier verifies the Authorized Sales Channel, purchase date, product identity, and applicable DA Series warranty term.

DA Series Specific Exclusions

The Global Warranty and Product Support Policy contains the complete exclusions. For DA Series amplifiers, claims are not covered to the extent the claimed failure was caused or contributed to by:

- Clipping, overpowering, excessive distortion, thermal or mechanical overload, incorrect impedance, short circuits, or improper DSP or crossover settings.
- Improper wiring, grounding, AC voltage, power connection, ventilation, installation, maintenance, storage, transportation, or operation.
- Water, moisture, condensation, salt air, chemical exposure, extreme temperature, power surge, lightning, accident, impact, misuse, or use outside published specifications.
- Unauthorized repair, modification, alteration, tampering, disassembly, or a non-approved replacement part only when it caused or contributed to the claimed failure, made reasonable evaluation impossible, or created a safety issue.

How to Obtain Warranty Service

Before shipping a DA Series amplifier, review current documentation and troubleshooting resources, gather the proof of purchase and model and serial number, and contact Sound Barrier, the original Authorized Sales Channel, an authorized distributor, or the designated service center.

Do not ship a product until Sound Barrier or its authorized service provider issues an RMA number or other written authorization. The customer is responsible for packaging, insuring, and shipping the product to the designated service point. Unauthorized shipments may be refused or returned at the customer's expense.

Remedies and Other Important Terms

For a confirmed covered defect, Sound Barrier may repair the amplifier, provide a replacement part, provide a comparable new or refurbished product, authorize local service, or provide another commercially reasonable remedy. A repaired or replacement item remains covered for the balance of the original applicable warranty period or 90 days, whichever is longer.

All general terms of the Sound Barrier Global Warranty and Product Support Policy apply, including international administration, freight rules, fees for non-warranty or No Fault Found service, limitations of liability, implied-warranty limitations, and non-waivable consumer rights. If this Summary conflicts with the Global Policy, the Global Policy controls all general terms; this Summary controls only the DA Series warranty duration and registration eligibility.

Policy Access
